Jim Novy: Automated cataloging processes

Cataloging Wiki:

Brief MARC bib record by form into catalog

Script goes out to Z39.50 cataloging utility (SkyRiver) to look for a match

Adjust record to local standards, local subject headings, etc.

Load record to system, overlaying the brief bib.

Bibs without a match, or without key elements, sent to original cataloger after approx. 10 weeks.

Dedupe app works through bibs that have been inadvertently been entered into catalog to test for merge

Who set up this system? D Dowling and J Novy, through two completely different plans for Prairie Lakes and Southwest

Brief bibs do display to patrons...prepublication records work through the process looking for bibs to overlay as well.

Authority records managed with SirsiDynix.

Updates from systems on possible projects:

These systems are not currently working with an authority vendor and would be our priority for spending grant funds first.

WRLS - Going with Backstage

MCFLS & MPL - Still working towards an authority vendor to go through their backfile.

Update from WiLS on project report

Date to meet to discuss continuing grant application:

- Use of a common bibliographic utility
- Automation of bibliographic editing
- Deduping

- No subjects

IUG Update from Kathy Setter:

Backstage now has Homoit headings available
